Description	Unmanaged Gigabit Fanless switch	Web-managed Gigabit Fanless switch	Managed Gigabit Switch	Managed Gigabit switch with increased security	Feature rich Gigabit switch with 10 GB Capability	Feature rich Gigabit switch with 10 GB Capability
Ports	8 or 24	8 or 24	24 or 48	24 or 48	24 or 48	24 or 48
Uplinks	1000-T, SX, LX, LH	1000-T, SX, LX, LH	1000-T, SX, LX, LH, 100-FX	1000-T, SX, LX, LH, 100-FX	1000-T, SX, LX, LH, 100-FX, CX4, SFP+	1000-T, SX, LX, LH, 100-FX, CX4, X2
Management	Non	Web Interface	WEB Interface, CLI, SNMP	WEB Interface, CLI, SNMP	WEB Interface, CLI, SNMP	WEB Interface, CLI, SNMP
VLANS		64	64	256	256	256
Monitoring			RMON	RMON, sFlow	RMON, sFlow	RMON, sFlow
Routing					RIP	RIP, OSPF, VRRP, PIM DM/SM QinQ
PoE					Yes - PoE Plus	Yes
Designed for						
Secure Connectivity	*	**	***	****	*****	*****
Scalability, Flexibility and Performance	**	***	***	****	*****	*****
Management and Visibility	**	**	***	***	*****	*****
Convergence and VoIP	*	*	**	**	***	*****
Type of Deployments						
	SOHO	SOHO	SME	SME to Medium Enterprise	Medium to Large Enterprise	Medium to Large Enterprise
	Small offices requiring good performance, Silent running for open office deployment	Small offices requiring good performance, Silent running for open office deployment. More secure with VLANs. Can be used in multi switch environments- small deployments	Ideal as an edge switch in medium to large deployments. Can be centrally managed with PCM+.	A Great Layer 2 enterprise switch. Entry point for business grade VMWare and iSCSI deployments	Feature rich L3 Switch with support for 10Gb connectivity. Great in the Datacenter. PoE+ option with QoS ideal for Security Cameras or 802.11N wireless implementations	Feature rich L3/L4 Switch with support for 10Gb connectivity. Granular QoS with PoE great for VoIP and Media Rich applications. Enhanced L3 Functionality. Best Performance
